

Erosion Control Operator

Carolina Infrastructure and Development is currently accepting resumes for a highly motivated construction professional to join our team as an Erosion Control Operator in Columbia SC. We are a general contractor serving residential and commercial construction clients. The Erosion Control Operator will be responsible for monitoring projects during or after construction to ensure projects conform to design specification and revisit land to view implemented land use practices or plans.

TYPICAL DUTIES:

- Install silt fence, hydroseeding (grass), spread of baled straw, etc.
- Process daily timesheets.
- Coordinate and cooperate with other onsite operations as necessary.
- Ensure that safety, compliance, environmental, and OSHA requirements are followed at all times.
- Perform miscellaneous job-related duties as assigned.

JOB REQUIREMENTS:

- Able to work independently and within a team.
- Skilled in operating with multiple equipment including a skid steer, backhoe, or mini excavator.
- Capable of personnel management and accountability.
- Able to work in a safety-conscious manner.
- Willing to work outdoors in extreme temperatures, both hot and cold, and other unusual elements, such as loud noise, dirt, dust, fumes, etc.
- Willing to work a flexible schedule, overtime, and weekends as required.
- Possess a valid driver's license, have a clean background, and pass a drug test.
